

National Immunization Partnership with the APA (NIPA)

Learning Collaborative to Improve HPV Immunization Coverage

Earn MOC, MC-FP, and CME credit

28% Reduction in missed opportunities

13% Increase in HPV series initiation

8% Increase in HPV series completion

GETTING RESULTS

Outcomes from prior cohorts

"I've participated in quite a few QI projects over the past 5 years, and this endeavor has been by far the most gratifying and well-organized program in which I have participated to date."

"It allowed me to focus on improving my HPV discussion with my patients. The knowledge that I learned from the project allowed myself and staff to better answer parents' questions regarding HPV vaccination."

Take a Shot!

Join the 2018 NIPA HPV Learning Collaborative

WHAT

The National Improvement Partnership Network (NIPN) and the Academic Pediatric Association (APA) are collaborating on a national practice-based quality improvement (QI) initiative, funded by the Centers for Disease Control and Prevention, to **improve adolescent human papillomavirus (HPV) immunization rates**, through strong provider recommendations and the reduction of missed opportunities.

WHEN

January 2018 – September 2018

WHO

Participants involved in the initiative may be **any organization** which serves adolescents and gives HPV vaccine (pediatric practice, family practice, school-based health center, community clinic, etc...)

WHERE

A multi-state, virtual learning collaborative. Participants join six webinars, communicate by e-mail and phone calls, receive monthly feedback reports and guidance.

WHY

- Earn credit towards professional certifications (ABP, Part 4 MOC, ABFM Part IV MC-FP and Performance Improvement CME)
- Receive QI coaching and support in assessing practice systems for HPV vaccine delivery, recognizing barriers, and selecting evidence-based strategies to test with PDSA cycles as well as monthly feedback reports tracking progress
- Increase knowledge and build skills on topics such as, strong provider recommendation for HPV vaccine, reducing missed opportunities for vaccination and adolescent-friendly office systems
- Help raise the 2016, series completion rate of 49.5% (girls) and 37.5% (boys), to meet the Healthy People 2020 goal of 80% while increasing the potential to prevent HPV-related cancers

HOW

Enroll by December 15, 2017: <https://www.surveymonkey.com/r/NIPAcohort4> Enrollment
